

Table of Contents

Introduction	1
1 What is Myopia?	4
1.1 How does it Feel being Myopic?	4
1.2 Basic Terminology of the Anatomy of the Eye	5
1.3 Accommodation	5
1.3.1 Myopia and Emmetropia	5
1.3.2 Theory of Accommodation	7
1.3.2.1 The Helmholtz Model	7
1.3.2.2 The Schachar Model	7
1.3.2.3 The Two-Phase-Model	8
1.3.2.4 Two other, Controversial Hypotheses	8
1.4 Refractive Myopia	9
1.4.1 Tonic Accommodation and Night Myopia	10
1.4.2 Pseudomyopia	11
1.4.3 Other Types of Myopia	12
1.5 Axial Myopia	13
1.6 "What Type of Myopia Do I Have?"	13
1.7 Consequences and Risks of Higher Myopia	13
1.8 Myopia and Age	18
1.9 Accommodation and Age / Presbyopia	18
1.10 Age Related Geometrical Changes of the Eye	20
1.11 The Refraction	21
1.11.1 Basic Procedure	21
1.11.2 A Method for Refraction: Fogging	25
1.11.3 The Range of Clarity	26
2 What Causes Myopia in General?	27
2.1 Is Myopia Inherited?	27
2.2 Connective Tissue Disorders	30
2.3 Active Growth by Imaging Effects	31
2.4 Mechanical Effects	31
2.5 General Overview of the Causes of Myopia	32
3 Myopia – Observations and Experimental Results	33
3.1 Distribution of Myopia by Region, Age, Gender and Ethnicity	33
3.2 Accommodation and Near Work	37
3.2.1 Experiences and Results	37
3.2.1.1 General Experiences and Results	37
3.2.1.2 The Effect of Accommodation on Axial Length and Scleral Thinning	41
3.2.1.3 The Effect of Accommodation on Image Quality	43

3.2.1.4	Timing- and Hysteresis- Effects of Accommodation	44
3.2.1.5	Cognitive Load and Near Work	46
3.2.1.6	Dark Focus and Accommodative Hysteresis	46
3.2.1.7	The Strength of Accommodation.....	46
3.2.1.8	Accommodation Spasm	48
3.2.1.9	Myopia caused by Hyperopia	49
3.2.1.10	"Screen sightedness" by SmartPhones and Tablet-PCs	50
3.2.1.11	Aniso-Accommodation	51
3.2.1.12	Is there a Connection between Blur Sensitivity and Accommodation Deficits?.....	51
3.2.1.13	Accommodation and the Nervous System	51
3.2.1.14	Accommodation and Biochemistry.....	52
3.2.1.15	"Emmetropization" towards Myopia via Accommodation?	53
3.2.1.16	Myopia before Modern Times	54
3.2.1.17	Summary of Results about Accommodation	54
3.2.2	Proposed Therapies Based on the Focusing and Accommodation Issue.....	56
3.2.2.1	Relaxing and Exercising.....	56
3.2.2.2	Biofeedback	58
3.2.2.3	Undercorrection for Near Work, Plus-, Bifocal- and Progressive- Glasses	59
3.2.2.3.1	General Results	59
3.2.2.3.2	Plus Addition, Bifocals and their Prismatic Effects.....	63
3.2.2.3.3	Plus glasses – are they Effective via Reduced Accommodation or via Modified Vergence? 64	
3.2.2.3.4	Bifocal and Multifocal Contact Lenses.....	65
3.2.2.3.5	Intermittent, Short Term Wearing of Plus Glasses	66
3.2.2.3.6	Permanent Undercorrection instead of Undercorrection for Near Work only	67
3.2.2.3.7	Why is there no Agreement about the Usefulness of Plus-Glasses?	69
3.2.2.3.8	Is the Accommodation System Getting too Lazy by the Plus-Glasses?.....	71
3.2.2.3.9	Plus-Glasses to Reverse Myopia?.....	71
3.2.2.3.10	Plus Glasses or Undercorrection – a Striking Result	72
3.2.2.3.11	Plus Glasses – a Summary.....	72
3.2.2.3.12	Comparison of the Various Optical Methods.....	75
3.2.2.3.13	Psychological Problems with Special Glassear Workes for Near Work.....	76
3.2.2.3.14	How to Break an Accommodation Spasm?.....	76
3.2.2.3.15	Get New Glasses?	77
3.2.2.3.16	Summary of the Accommodation Based Therapies.....	78
3.3	The Effects of Image Quality.....	80
3.3.1	Basic Results	80
3.3.2	Dopamine and Light Exposure – and General Effects of Dopamine	82
3.3.3	Remarks on the Image Quality Model	85
3.3.4	"Emmetropization" towards Myopia via Image Quality?	86
3.3.5	Intermittent, Short Term Wearing of Plus Glasses	89

3.3.6	Duration of Undercorrection	91
3.3.7	Contrast and Spatial Frequency.....	91
3.3.8	Monochromatic Aberrations and other Optical Deficiencies	92
3.3.9	Longitudinal Chromatic Aberrations / Myopic and Hyperopic Defocus.....	96
3.3.10	Peripheral Defocus and Corresponding Dual-Focus and Multifocal Lenses	96
3.3.10.1	Peripheral Defocus – Some Commercial Applications for Spectacle Glasses and Contact Lenses.....	100
3.3.11	Summary of the Effects of the Image Quality.....	101
3.4	Consequences of Myopia on the Biochemistry of the Eye.....	102
3.5	Basic Question – what Elongates the Eye.....	107
3.5.1	Image Quality and Accommodation	107
3.5.2	Myopia by Accommodation or Myopia by Degraded Image Quality?.....	108
3.5.3	Emmetropization by Growth or Mechanical Stretching or Biochemical Thinning?.....	111
3.6	Phoria, Convergence, Astigmatism and Anisometropia	112
3.6.1	Phoria.....	112
3.6.2	The AC/A Ratio.....	113
3.6.3	The CA/C Ratio, and some more Types of Vergence	115
3.6.4	Hysteresis of Vergence	116
3.6.5	Glasses, Contact Lenses and Vergence.....	116
3.6.6	Prescription of Prisms.....	117
3.6.7	The Impact of Vergence on the Axial Length.....	119
3.6.8	Astigmatism	119
3.6.9	Anisometropia	119
3.6.10	Summary of the Vergence Related Effects	120
3.7	Saccades and Focusing	121
3.8	Mechanical Properties, Stress, Strain and Pressure	122
3.8.1	Impact of Mechanics on Biochemistry.....	122
3.8.2	Intraocular Pressure (IOP)	123
3.8.3	The Ciliary and other Muscles	125
3.8.4	The Lens.....	127
3.8.5	The Pupil Size	128
3.8.6	The Ocular Shape.....	128
3.8.7	The Choroid	130
3.8.8	The Zonular Fibers	131
3.9	Relations between the Dimensions of the Cornea, the Crystalline Lens and the Ciliary Muscle	131
3.10	Growth or Stretching and Thinning or Biochemical Thinning of the Sclera in Myopic Eyes?.....	132
3.11	Outdoor Activities.....	134
3.12	Exposure to Bright Sunlight	137
3.13	Seasonal Impact.....	137
3.14	Physical Exercises.....	137
3.15	Illumination / Contrast / Light / Day- and Night-Rhythm	138

3.15.1	Level of Illumination	138
3.15.2	Color of Illumination – Wavelength of the Light.....	146
3.15.2.1	Individual Results	146
3.15.2.2	The Effect of Broadband Illumination.....	151
3.15.2.3	The Retina and Chromatic Aberration	152
3.15.2.4	Melanopsin and Neuropsin.....	152
3.15.2.5	Blue Light Emitted from Electronic Screens: What are the Risks?.....	152
3.15.2.6	LLLT – Low-Level Laser Therapy / LLRT – Long-Wavelength Red Light Therapy / RLRL – Repeated Low-Level Red-Light	153
3.15.3	Contrast	155
3.15.4	Day- and Night-Rhythm and Sleep-Characteristics.....	155
3.15.5	Flickering Light and Flashing Light	158
3.16	Vision Training / Vision Therapy / Behavioral Optometry.....	159
3.17	Temperature.....	160
3.18	Blood Circulation	161
3.19	Some Specific Biochemical Issues.....	163
3.19.1	The Immune System	163
3.19.2	Inflammation towards Progressive and Pathologic / Malignant Myopia	165
3.19.3	Oxidative Stress and Antioxidant Defense.....	167
3.19.4	Enzymes Glutathione, Glutathione Peroxidase, Superoxide Dismutase, G6PD.....	168
3.19.5	The Blood-Retinal Barrier	169
3.19.6	The Vitreous Body.....	170
3.19.7	Nitric Oxide (NO).....	170
3.19.8	Cross-Linking of the Collagen of the Sklera by UV-Radiation and Roboflavin	172
3.19.9	More Biochemical and Biomechanical Effects.....	173
3.20	Mental Issues.....	174
3.20.1	Stress and Cortisol	174
3.20.2	Personality and Mentality.....	178
3.21	Why are some People not becoming Myopic, Independent from the Circumstances?	179
3.22	A Study: Factors Associated with Myopia in School Children.....	181
3.23	Myopic Changes in Pregnancy	182
3.24	COVID-19 and Myopia	182
3.25	Impact of Nutritional Components.....	182
3.25.1	Carbohydrates, Blood Sugar Level, Insulin Metabolism	183
3.25.2	Is there a Connection between the Blood Sugar Level and Negative-Lens-Induced Myopia?.....	186
3.25.3	Calcium, Vitamin D and Sunlight.....	187
3.25.4	Vitamin D and Dopamine.....	190
3.25.5	Selenium and Dopamine.....	190
3.25.6	Magnesium	190
3.25.7	Copper and Zinc.....	191
3.25.8	Chromium	193

3.25.9	Manganese	193
3.25.10	Potassium	194
3.25.11	Fluoride.....	194
3.25.12	Salt	194
3.25.13	Fat and Cholesterol.....	195
3.25.14	Vitamin A	195
3.25.15	B-Vitamins.....	195
3.25.15.1	Riboflavin plus UVA [blue light]	196
3.25.16	Some More Antioxidants	197
3.25.16.1	Selenium	197
3.25.16.2	Flavonoids and Related Compounds, and Vitamin E	198
3.25.17	Folic Acid and Homocysteine.....	199
3.25.17.1	Observations.....	199
3.25.17.2	An Explanation.....	199
3.25.18	Bilberry and Anthocyanins.....	200
3.25.19	Lactoferrin	200
3.25.20	Croctin	201
3.25.21	Vegetarian Diet	201
3.25.22	Other Components of the Diet	202
3.25.23	Overall Nutritional Status and Myopia	202
3.26	Pharmaceuticals.....	203
3.26.1	Atropine.....	203
3.26.1.1	Comparison of Various Concentration of Atropine	207
3.26.1.2	Atropine plus Orthokeratology	208
3.26.2	7-Methylxanthine	208
3.26.3	Some other Pharmazeutical Agents	209
3.26.4	Dopamine – a Summary	210
3.26.4.1	What Impact has a low Level of Dopamine?	210
3.26.4.2	What Increases the Level of Dopamine?	210
3.26.4.3	Is the Couple Dopamine / Melatonin a Key-Player?	211
3.27	Other Means to Slow Down or Stop Progression of Myopia	212
3.27.1	Contact Lenses.....	212
3.27.2	Orthokeratology / Overnight Corneal Reshaping (OCR).....	215
3.27.3	Orthocology	219
3.27.4	Reinforcement of the Sclera	219
3.27.5	Acupuncture and Acupressure	220
3.27.6	Electrostimulation	220
3.28	Summary of Randomized Trials to Slow Progression of Myopia	220
3.28.1	Single Trials	220
3.28.2	Comparisons of the Efficacy of the Various Measures to Slow the Progression of Myopia....	221
3.28.3	Rebound Effects.....	223

3.29	Correction of Myopia by Surgery.....	223
3.29.1	Manipulation of the Cornea	223
3.29.1.1	Radial Keratotomy RK	223
3.29.1.2	Photorefractive Keratectomy (PRK).....	224
3.29.1.3	Laser In Situ Keratomileusis (LASIK, Epi-LASIK), Laser Epithelial Keratomileusis (LASEK), Femto-LASIK.....	224
3.29.1.4	Small Incision Lenticule Extraction (SMILE).....	225
3.29.1.5	Intrastromal Corneal Ring.....	225
3.29.1.6	Artificial Cornea	225
3.29.2	Manipulation of the Lens System inside the Eye.....	225
3.29.2.1	Exchange of the biological lens:.....	226
3.29.2.2	Adding an additional lens:	226
3.29.2.3	Risk-comparison between LASIK and implantable contact lenses (ICL):	227
3.29.3	Enforcing the Sclera.....	227
3.30	A Few Recommendations	228
3.31	Summary: What Causes Myopia?.....	229
3.31.1	School and Myopia	230
3.31.2	Is Myopia Caused by Mechanical or by Biochemical Processes?.....	230
3.31.3	Is Myopia caused by Mechanical or Optical Processes – are Saccades a Linkage?	231
3.31.4	Prevention of Progression of Myopia or Prevention of Myopia?	232
3.31.5	Working against Myopia or against the Consequences of Myopia?.....	232
3.31.6	Functional- versus Structural- Deficits.....	232
3.31.7	Is Myopia Inherited or Acquired?	233
3.31.8	Congenital Myopia, and Inherited Diseases which are related to Myopia.....	234
3.31.9	From Simple to High and Progressive Myopia.....	237
3.31.10	Summary of the Summary: Are the Published Results really Contradictory? Maybe not!.....	237
3.32	For Further Reading –Extensive Compilations.....	242
4	Additional Information	245
4.1	Optical Correction.....	245
4.1.1	Glasses	245
4.1.2	The Material of the Glass.....	245
4.1.3	The Coating of the Glass	246
4.2	Contact Lenses.....	246
4.2.1	Basic Types of Lenses – Soft Lenses versus Hard Lenses	247
4.2.2	How about Lenses for Permanent Wear?.....	251
4.2.3	Potential Complications.....	252
4.2.4	Parameters of the Material for Contact Lenses.....	253
4.2.4.1	Oxygen Transmission	253
4.2.4.2	Wettability and Resistance against Deposits	255
4.2.4.3	Hardness and Stability	256
4.2.4.4	Specific Weight and Refractive Index	257

4.2.4.5	UV Blocking	257
4.2.4.6	Color / Tint of the Lens	257
4.2.5	Parameters of the Geometry of Contact Lenses.....	257
4.2.6	Surface and Edge Finishing	261
4.2.7	The Fitting of Contact Lenses.....	261
4.2.8	The "Right" Power of Contact Lenses	262
4.2.9	Determining the Refraction after Wearing Contact Lenses.....	262
4.2.10	Maintenance of the Lenses.....	263
4.2.10.1	Maintenance of Hard RGP Lenses.....	263
4.2.10.2	Maintenance of Soft Lenses.....	264
4.2.11	"I Cannot Wear Contact Lenses"	265
4.2.12	Presbyopia	266
4.2.13	Contact Lenses and Nutrition	268
4.3	Refractive Surgery.....	269
4.4	Useful Links.....	272
