

Table of Contents

Introduction	1
1 What is Myopia?	4
1.1 How does it Feel being Myopic?	4
1.2 Basic Terminology of the Anatomy of the Eye	5
1.3 Accommodation	5
1.3.1 Myopia and Emmetropia	5
1.3.2 Theory of Accommodation	7
1.3.2.1 The Helmholtz Model	7
1.3.2.2 The Schachar Model	7
1.3.2.3 The Two-Phase-Model	8
1.3.2.4 Two other, Controversial Hypotheses	8
1.4 Refractive Myopia	9
1.4.1 Tonic Accommodation and Night Myopia	10
1.4.2 Pseudomyopia	11
1.4.3 Other Types of Myopia	12
1.5 Axial Myopia	13
1.6 "What Type of Myopia Do I Have?"	13
1.7 Consequences and Risks of Higher Myopia	13
1.8 Myopia and Age	18
1.9 Accommodation and Age / Presbyopia	18
1.10 Age Related Geometrical Changes of the Eye	20
1.11 The Refraction	21
1.11.1 Basic Procedure	21
1.11.2 A Method for Refraction: Fogging	25
1.11.3 The Range of Clarity	26
2 What Causes Myopia in General?	27
2.1 Is Myopia Inherited?	27
2.2 Connective Tissue Disorders	30
2.3 Active Growth by Imaging Effects	31
2.4 Mechanical Effects	31
2.5 General Overview of the Causes of Myopia	32
3 Myopia – Observations and Experimental Results	33
3.1 Distribution of Myopia by Region, Season, Age, Gender and Ethnicity	33
3.2 Accommodation and Near Work	37
3.2.1 Experiences and Results	37
3.2.1.1 General Experiences and Results	37
3.2.1.2 The Effect of Accommodation on Axial Length and Scleral Thinning	41
3.2.1.3 Timing- and Hysteresis- Effects of Accommodation	44

3.2.1.4	The Effect of Accommodation on Image Quality	46
3.2.1.5	Cognitive Load and Near Work	46
3.2.1.6	Dark Focus and Accommodative Hysteresis	47
3.2.1.7	The Strength of Accommodation.....	47
3.2.1.8	Accommodation Spasm	49
3.2.1.9	Myopia caused by Hyperopia	50
3.2.1.10	"Screen sightedness" by SmartPhones and Tablet-PCs	51
3.2.1.11	Aniso-Accommodation	52
3.2.1.12	Is there a Connection between Blur Sensitivity and Accommodation Deficits?.....	52
3.2.1.13	Accommodation and the Nervous System	53
3.2.1.14	Accommodation and Biochemistry.....	54
3.2.1.15	"Emmetropization" towards Myopia via Accommodation?	54
3.2.1.16	Myopia before Modern Times	55
3.2.1.17	Summary of Results about Accommodation	56
3.2.2	Proposed Therapies Based on the Focusing and Accommodation Issue.....	57
3.2.2.1	Relaxing and Exercising.....	57
3.2.2.2	Biofeedback	59
3.2.2.3	Undercorrection for Near Work, Plus-, Bifocal- and Progressive- Glasses	60
3.2.2.3.1	General Results	60
3.2.2.3.2	Plus Addition, Bifocals and their Prismatic Effects.....	64
3.2.2.3.3	Plus glasses – are they Effective via Reduced Accommodation or via Modified Vergence? 65	
3.2.2.3.4	Bifocal and Multifocal Lenses	66
3.2.2.3.5	Intermittent, Short Term Wearing of Plus Glasses	68
3.2.2.3.6	Permanent Undercorrection instead of Undercorrection for Near Work only	68
3.2.2.3.7	Why is there no Agreement about the Usefulness of Plus-Glasses?	71
3.2.2.3.8	Is the Accommodation System Getting too Lazy by the Plus-Glasses?.....	72
3.2.2.3.9	Plus-Glasses to Reverse Myopia?.....	73
3.2.2.3.10	Plus Glasses or Undercorrection – a Striking Result	73
3.2.2.3.11	Plus Glasses – a Summary	74
3.2.2.3.12	Comparison of the Various Optical Methods.....	77
3.2.2.3.13	Psychological Problems with Special Glassear Workes for Near Work.....	78
3.2.2.3.14	How to Break an Accommodation Spasm?.....	78
3.2.2.3.15	Get New Glasses?	79
3.2.2.3.16	Summary of the Accommodation Based Therapies.....	80
3.3	The Effects of Image Quality.....	82
3.3.1	Basic Results	82
3.3.2	Dopamine and Light Exposure – and General Effects of Dopamine	84
3.3.3	Remarks on the Image Quality Model	87
3.3.4	"Emmetropization" towards Myopia via Image Quality?	88
3.3.5	Intermittent, Short Term Wearing of Plus Glasses	91

3.3.6	Duration of Undercorrection	93
3.3.7	Contrast and Spatial Frequency.....	93
3.3.8	Monochromatic Aberrations and other Optical Deficiencies	94
3.3.9	Longitudinal Chromatic Aberrations / Myopic and Hyperopic Defocus.....	98
3.3.10	Peripheral Defocus and Corresponding Dual-Focus and Multifocal Lenses and Devices	98
3.3.10.1	Peripheral Defocus – Some Commercial Applications for Spectacle Glasses and Contact Lenses.....	103
3.3.10.2	Peripheral Defocus – an augmented Optical System.....	104
3.3.11	Summary of the Effects of the Image Quality.....	104
3.4	Consequences of Myopia on the Biochemistry of the Eye	105
3.5	Basic Question – what Elongates the Eye.....	110
3.5.1	Image Quality and Accommodation	110
3.5.2	Myopia by Accommodation or Myopia by Degraded Image Quality?.....	111
3.5.3	Emmetropization by Growth or Mechanical Stretching or Biochemical Thinning?.....	114
3.6	Phoria, Convergence, Astigmatism and Anisometropia	115
3.6.1	Phoria.....	115
3.6.2	The AC/A Ratio.....	116
3.6.3	The CA/C Ratio, and some more Types of Vergence	118
3.6.4	Hysteresis of Vergence	119
3.6.5	Glasses, Contact Lenses and Vergence	120
3.6.6	Prescription of Prisms.....	121
3.6.7	The Impact of Vergence on the Axial Length.....	122
3.6.8	Astigmatism	122
3.6.9	Anisometropia	123
3.6.10	Summary of the Vergence Related Effects	123
3.7	Saccades and Focusing	124
3.8	Mechanical Properties, Stress, Strain and Pressure	125
3.8.1	Impact of Mechanics on Biochemistry.....	125
3.8.2	Intraocular Pressure (IOP)	126
3.8.3	The Ciliary and other Muscles	129
3.8.4	The Lens.....	131
3.8.5	The Pupil Size	132
3.8.6	The Ocular Shape.....	132
3.8.7	The Choroid	134
3.8.8	The Sclera	134
3.8.9	The Zonular Fibers	134
3.9	Relations between the Dimensions of the Cornea, the Crystalline Lens and the Ciliary Muscle	135
3.10	Growth or Stretching and Thinning or Biochemical Thinning of the Sclera in Myopic Eyes?.....	136
3.11	Outdoor Activities.....	138
3.12	Seasonal Impact.....	141
3.13	Physical Exercises.....	141

3.14	Illumination / Contrast / Light / Day- and Night-Rhythm	142
3.14.1	Level of Illumination	142
3.14.2	Color of Illumination – Wavelength of the Light.....	150
3.14.2.1	Individual Results	150
3.14.2.2	The Effect of Broadband Illumination.....	155
3.14.2.3	The Retina and Chromatic Aberration	156
3.14.2.4	Melanopsin and Neuropsin.....	156
3.14.2.5	Ultraviolet A Light plus Riboflavin.....	157
3.14.2.6	Blue Light Emitted from Electronic Screens: What are the Risks?.....	158
3.14.2.7	LLLT – Low-Level Laser Therapy / LLRT – Long-Wavelength Red Light Therapy / RLRL – Repeated Low-Level Red-Light	159
3.14.3	Contrast	161
3.14.4	Day- and Night-Rhythm and Sleep-Characteristics.....	161
3.14.5	Flickering Light and Flashing Light	164
3.15	Vision Training / Vision Therapy / Behavioral Optometry	165
3.16	Temperature	166
3.17	Blood Circulation	168
3.18	Some Specific Biochemical Issues	170
3.18.1	The Immune System	170
3.18.2	Inflammation towards Progressive and Pathologic / Malignant Myopia	172
3.18.3	Oxidative Stress and Antioxidant Defense.....	174
3.18.4	Enzymes Glutathione, Glutathione Peroxidase, Superoxide Dismutase, G6PD.....	175
3.18.5	The Blood-Retinal Barrier	176
3.18.6	The Vitreous Body.....	177
3.18.7	Nitric Oxide (NO).....	177
3.18.8	More Biochemical and Biomechanical Effects.....	179
3.19	Mental Issues	181
3.19.1	Stress and Cortisol	181
3.19.2	Personality and Mentality.....	184
3.20	Why are some People not becoming Myopic, Independent from the Circumstances?	185
3.21	A Study: Factors Associated with Myopia in School Children	186
3.22	Myopic Changes in Pregnancy	187
3.23	COVID-19 and Myopia	188
3.24	Impact of Nutritional Components.....	188
3.24.1	Carbohydrates, Blood Sugar Level, Insulin Metabolism	189
3.24.2	Is there a Connection between the Blood Sugar Level and Negative-Lens-Induced Myopia?.....	192
3.24.3	Calcium, Vitamin D and Sunlight.....	192
3.24.4	Selenium	196
3.24.5	Magnesium	197
3.24.6	Copper and Zinc	198
3.24.7	Chromium	200

3.24.8	Manganese	200
3.24.9	Potassium	201
3.24.10	Fluoride.....	201
3.24.11	Salt 201	
3.24.12	Fat and Cholesterol.....	202
3.24.13	Vitamin A	202
3.24.14	B-Vitamins.....	202
3.24.15	Flavonoids and Related Compounds, and Vitamin E	203
3.24.16	Folic Acid and Homocysteine.....	204
3.24.17	Bilberry and Anthocyanins.....	205
3.24.18	Lactoferrin	205
3.24.19	Crocetin	206
3.24.20	Ginkgo Biloba	206
3.24.21	Lutein	207
3.24.22	Vegetarian Diet.....	207
3.24.23	Other Components of the Diet	207
3.24.24	Overall Nutritional Status and Myopia	208
3.25	Pharmaceuticals.....	209
3.25.1	Atropine.....	209
3.25.1.1	Comparison of Various Concentration of Atropine	213
3.25.1.2	Atropine plus Ortokeratolgy	214
3.25.2	7-Methylxanthine	214
3.25.3	Some other Pharmazeutical Agents	214
3.25.4	Dopamine – a Summary	216
3.25.4.1	What Impact has a low Level of Dopamine?	216
3.25.4.2	What Increases the Level of Dopamine?	216
3.25.4.3	Is the Couple Dopamine / Melatonin a Key-Player?	217
3.26	Other Means to Slow Down or Stop Progression of Myopia	218
3.26.1	Contact Lenses.....	218
3.26.2	Orthokeratology / Overnight Corneal Reshaping (OCR)	221
3.26.3	Orthocology	225
3.26.4	Reinforcement of the Sclera.....	225
3.26.5	Acupuncture and Acupressure	226
3.26.6	Electrostimultion	226
3.27	Summary of Randomized Trials to Slow Progression of Myopia	226
3.27.1	Single Trials.....	226
3.27.2	Comparisons of the Efficacy of the Various Measures to Slow the Progression of Myopia....	227
3.27.3	Rebound Effects.....	229
3.28	Correction of Myopia by Surgery.....	230
3.28.1	Manipulation of the Cornea	230
3.28.1.1	Radial Keratotomy RK.....	230

3.28.1.2	Photorefractive Keratectomy (PRK).....	230
3.28.1.3	Laser In Situ Keratomileusis (LASIK, Epi-LASIK), Laser Epithelial Keratomileusis (LASEK), Femto-LASIK.....	231
3.28.1.4	Small Incision Lenticule Extraction (SMILE).....	231
3.28.1.5	Intrastromal Corneal Ring.....	232
3.28.1.6	Artificial Cornea	232
3.28.2	Manipulation of the Lens System inside the Eye.....	232
3.28.2.1	Exchange of the biological lens, RLE	233
3.28.2.2	Adding an additional lens, pIOL	233
3.28.2.3	Risk-comparison between LASIK and implantable contact lenses (ICL):	234
3.29	A Few Recommendations	234
3.30	Summary: What Causes Myopia?.....	235
3.30.1	School and Myopia	236
3.30.2	Is Myopia Caused by Mechanical or by Biochemical Processes?.....	237
3.30.3	Is Myopia caused by Mechanical or Optical Processes – are Saccades a Linkage?	238
3.30.4	Prevention of Progression of Myopia or Prevention of Myopia?	238
3.30.5	Working against Myopia or against the Consequences of Myopia?.....	239
3.30.6	Functional- versus Structural- Deficits.....	239
3.30.7	Is Myopia Inherited or Acquired?	240
3.30.8	Congenital Myopia, and Inherited Diseases which are related to Myopia.....	241
3.30.9	From Simple to High and Progressive Myopia.....	244
3.30.10	Summary of the Summary: Are the Published Results really Contradictory? Maybe not!.....	244
3.31	For Further Reading –Extensive Compilations.....	249
4	Additional Information	253
4.1	Optical Correction.....	253
4.1.1	Glasses	253
4.1.2	The Material of the Glass.....	253
4.1.3	The Coating of the Glass	254
4.2	Contact Lenses.....	254
4.2.1	Basic Types of Lenses – Soft Lenses versus Hard Lenses	255
4.2.2	How about Lenses for Permanent Wear?.....	259
4.2.3	Potential Complications.....	260
4.2.4	Parameters of the Material for Contact Lenses.....	261
4.2.4.1	Oxygen Transmission	261
4.2.4.2	Wettability and Resistance against Deposits	263
4.2.4.3	Hardness and Stability	264
4.2.4.4	Specific Weight and Refractive Index	265
4.2.4.5	UV Blocking	265
4.2.4.6	Color / Tint of the Lens	265
4.2.5	Parameters of the Geometry of Contact Lenses.....	265
4.2.6	Surface and Edge Finishing	269

4.2.7	The Fitting of Contact Lenses.....	269
4.2.8	The "Right" Power of Contact Lenses	270
4.2.9	Determining the Refraction after Wearing Contact Lenses.....	270
4.2.10	Maintenance of the Lenses.....	271
4.2.10.1	Maintenance of Hard RGP Lenses.....	271
4.2.10.2	Maintenance of Soft Lenses.....	272
4.2.11	"I Cannot Wear Contact Lenses".....	273
4.2.12	Presbyopia	274
4.2.13	Contact Lenses and Nutrition	276
4.3	Refractive Surgery.....	277
4.4	Useful Links.....	280
